Say you spend $3,000 on ads and book 40 calls at $75 each.

Ricky Jones
@rickyjones.ig

Then 43% of them don’t show. That’s 23 calls, not 40.

You didn’t pay $75 per call. You paid $131 for every call that actually happened.

Ricky Jones
@rickyjones.ig

Most people see the $75 and try to bring it down. A cheaper lead doesn’t fix a 43% no-show rate. It just gives you more people who won’t show.

Ricky Jones
@rickyjones.ig

Track cost per shown call, not cost per lead. Then look at the gap between the booking and the call before you touch the ads.
