4 places a booked call dies, in the order to check them.

Ricky Jones
@rickyjones.ig

1. The ad.

Say 8 in 10 booked calls are the wrong person.
Nothing after the ad can fix that.

Ricky Jones
@rickyjones.ig

2. The gap between booking and the call.

Say 4 in 10 never show. The call was never the problem. The 48 hours before it was.

@rickyjones.ig

3. The call itself.

Judge your close rate only after layers 1 and 2 are clean. Otherwise you’re grading the closer on the wrong people.

Ricky Jones

4. The offer.

Last, because it’s the most expensive thing to change and the least likely to be broken.

Fix the first broken layer. Then move down.
